Subject: **Commission Agenda Item – Change Order 1 & Final for the 2022 Sidewalk Repair & Replacement Project**

ITEM FOR CONSIDERATION: Requesting legislation for approval of Change Order 1 and Final for the 2022 Sidewalk Repair & Replacement Project.

BACKGROUND INFORMATION: Legislation was passed at the June 27, 2022, City Commission meeting awarding a construction contract for the 2022 Sidewalk Repair & Replacement Project to The Kreimes Co. Inc. of Sandusky, Ohio pursuant to Ordinance 22-127 in the amount of \$121,116.33. The project consisted of over 9,875 square feet of sidewalk repairs and 127 linear feet of curb repairs and included several residential locations and improvements to heaved slabs within the northwest quadrant of Washington Park.

During the project the need for a pedestrian crossing was identified on Campbell Street at the Buchanan Street intersection as staff has observed an increase of pedestrian traffic in the area since the Intermediate School has been opened. The City began coordinating with the contractor to come up with a plan to address this issue, but work could not be completed in the same calendar year as the contractor ran out of good weather to complete the work, pushing it into 2023. In coordination with our City Street Crews, a push activated pedestrian signal has been installed at this location to assist with the safety of pedestrians.

The original completion date for this project was set for October 21, 2022, however, with the late addition of the crossing at Buchanan Street, the project got pushed into 2023, extending the completion date to July 22, 2023.

BUDGETARY INFORMATION: The original contract with Kreimes was \$121,116.33, Change Order 1 is an increase of \$1,385.45 and shall be paid for with Issue 8 infrastructure funds from the Capital Projects Fund, total contract at the end of the project \$122,501.78.

ACTION REQUESTED: It is recommended that proper legislation be prepared for Changer Order 1 & Final for the 2022 Sidewalk Repair & Replacement Project, increasing the contract by \$1,385.45, with a final contract cost of \$122,501.78 be approved and that the necessary legislation be passed under suspension of the rules and in accordance with Section 14 of the City Charter to allow for final payment on this project to be made and to close out the completed project.

Subject: Commission Agenda Item – Granting a Permanent Utility Easement to Columbia Gas of Ohio, Inc. on City Property (East Market Street Grounds)

ITEM FOR CONSIDERATION: Requesting legislation granting a permanent utility easement to Columbia Gas of Ohio, Inc. on City Property platted as Market Grounds between Hancock Street and Franklin Street.

BACKGROUND INFORMATION: In order for Columbia Gas to install a new service line to 326 E Market Street (Parcel No. 56-01156.000) off of their main to the property landlocked by private properties and a City parking lot known as the East Markert Street Grounds (Parcel No 56-68066.000), Columbia Gas will have to run the line through City property.

Through discussion with Columbia Gas and City staff, it was decided the best location for the new service line would be under the walk on the South side of the lot abutting the commercial properties, as the parking lot was recently repaved. With the installation, Columbia Gas has agreed to replace the sidewalks over the new service line. In addition, the specific location does not restrict or prohibit future planned projects on or near the site, as this specific area is used as a means of access to the businesses along the parking lot.

BUDGETARY INFORMATION: The cost of preparing the legal description and the recording of this easement will be borne by Columbia Gas of Ohio, Inc.

ACTION REQUESTED: It is recommended that proper legislation be prepared granting a permanent utility easement to Columbia Gas of Ohio, Inc. on City Property platted as Market Grounds between Hancock Street and Franklin Street Parcel No. 56-68066.00 for installation of a new gas service line to the property located at 326 East Market Street be approved and that the necessary legislation be passed under suspension of the rules and in accordance with Section 14 of the City Charter in order for the easement agreement to be immediately executed and recorded so that construction of the service line can begin immediately, prior to heating season.

Date: September 5, 2023

Subject: Commission Agenda Item –Amending Resolution No. 036-23R and Amending OPWC Application, Round 38 for the Downtown Street Paving Project

ITEM FOR CONSIDERATION: Requesting legislation amending Resolution No. 036-23R, and approving the submission of an amended application to participate in the Ohio Public Works Commission (OPWC) Round 38 State Capital Improvement Program (SCIP) and/or Local Transportation Improvement Program (LTIP) and to execute contracts as required for the Downtown Street Paving Project.

BACKGROUND INFORMATION: The last downtown street resurfacing was in 1999 as part of a large-scale streetscape project. At 24 years old, this pavement surface has outlived its useful life with potholes prevalent on most of these blocks of streets. The blocks of Market beyond Jackson and Wayne Streets are 47 years old (from 1976), according to City records. With over almost 2,000 vehicles per day on each of these streets and popularity of downtown, this project looks to score well based on the Public Works Commissions scoring criteria. The specific work would mill and pave the most deteriorated surface course of asphalt, repair/replace full-depth sections, adjust manholes and improve drainage and striping within this segment. Subsequent to approval of Resolution No. 036-23R, passed on August 28, 2023, the amount of funds to be requested was increased and therefore it is necessary to amend the Resolution.

BUDGETARY INFORMATION: There is no cost to submit the application. If awarded, any matching funds required would be incorporated into the 2024 budget. The cost of the project is currently estimated at \$492,615. The City is applying for **\$246,307.50 (50%)** of OPWC funds. The City's portion of the project is **\$246,307.50 (50%)** and will be paid with annual resurfacing funds from the City's 2024 budget.

Notification of award would be in December 2023. If awarded, the project could be constructed as soon as late summer/fall of 2024. Supplementing City funds with OPWC grant funds is desirable to reduce the City's share, and to allow more streets beyond downtown to be paved, as staff have been working on in recent years.

ACTION REQUESTED: It is recommended that legislation be approved amending Resolution No. 036-23R and approving the submission of an amended application to participate in the OPWC Round 38 SCIP / LTIP Program and that the necessary legislation be passed under suspension of the rules and in accordance with Section 14 of the City Charter in order to submit this amended Resolution for the grant application package that was already submitted to the OPWC District 5 Integrating Committee by the deadline.

WHEREAS, a certified copy of the legislation approving the project is required by the governing body of the applicant; and

WHEREAS, this Resolution should be passed as an emergency measure under suspension of the rules in accordance with Section 14 of the City Charter in order to submit the amended Resolution for the grant application package that was already submitted to the OPWC District 5 Integrating Committee by the deadline; and

Subject: **Commission Agenda Item – Award a Contract to Great Lakes Demolition Company of Clyde, OH for the Butler Street Reconstruction Project**

ITEM FOR CONSIDERATION: Requesting legislation awarding a contract to Great Lakes Demolition Company of Clyde, Ohio for the Butler Street Reconstruction project.

BACKGROUND INFORMATION: Legislation was presented at the July 24, 2023, City Commission meeting requesting permission to bid the Butler Street Reconstruction project (Resolution No. 028-23R). Reconstruction of Butler Street will consist of full depth asphalt cross section being built up to accommodate the heavy traffic from industry, tourism and local traffic, with the roadway keeping the same alignment and curb lines. Most of the existing center lane of the three-lane section will become a drainage area for road runoff with trees and grass. The approach to Cleveland Road will become three lanes again, providing turn lanes for each direction. It has been verified through different studies that that due to reduced traffic from US 250 via the ramp, that two lanes will sufficiently carry the traffic during typical in-bound or out-bound events of Cedar Point Park.

The following bids were received on Thursday, August 31, 2023, at a formal bid opening:

Great Lakes Demolition Co. Sandusky, OH	Base Bid: \$792,879.50 Alternate A: \$22,600.00 Alternate B: \$37,500.00 Alternate C: \$37,500.00 Bond: 100%
Erie Blacktop Sandusky, OH	Base Bid: \$828,503.73 Alternate A: \$20,090.00 Alternate B: \$37,500.00 Alternate C: \$37,500.00 Bond: 100%
Ed Burdue & Co. Sandusky, OH	Base Bid: \$876,614.57 Alternate A: \$20,580.00 Alternate B: \$38,250.00 Alternate C: \$38,250.00 Bond: 100%

Local preference does not apply to this project, as federal funding is being used. Based on the bids submitted, Great Lakes Demolition Company is the lowest and best bidder. The bid includes the Base bid plus Alternates A-C, which includes awarding quantities for concrete repairs along the concrete "Frontage Roads", which run parallel to and under the Milan Road overpass. The bid is 4.4% less than the Engineer's Estimate (\$930,740.00) for construction.

BUDGETARY INFORMATION: The total construction cost of the project based on bids is \$890,479.50 which will be paid for with American Rescue Plan Act Stimulus Funds.

ACTION REQUESTED: It is recommended that proper legislation awarding a contract to Great Lakes Demolition Company of Clyde, Ohio in an amount not to exceed \$890,479.50 be approved and that the necessary legislation be passed under suspension of the rules and in accordance with Section 14 of the City Charter to allow so that the construction work may begin as early as possible, in order that construction can wrap up in the spring of 2024.

Subject: Commission Agenda Item – Lining Repair and Replacement to the Inside of the Dome Building at Big Island Water Works (BIWW)

ITEM FOR CONSIDERATION: Requesting legislation authorizing the expenditure of funds for the Lining Repair and Replacement to the inside of the Dome Building at Big Island Water Works (BIWW) with Advanced Rehabilitation Technology, LLC of Bryan, OH, through the Purchasing Cooperative of America (PCA) purchasing program, reference item #PCA OD-347-21.

BACKGROUND INFORMATION: During a recent inspection of the Pre-Sedimentation (Dome) Building at BIWW facility it was discovered that the coating system is at the end of its useful life, showing signs of potential failures. Maintenance crews at the facility are experiencing portions of the lining material to be “flaking” off and dropping into coagulated water in a clarifier, which causes disruption to the treatment process and requires time to take the necessary precautions to remove such debris. Records indicate the last rehabilitation project on the dome and its lining was in 2013.

Over the past month staff has worked to find a solution to the problem, which led them to working with Advanced Rehabilitation Technology, LLC, who is an authorized vendor with the Purchasing Cooperative of America (PCA) purchasing program. PCA is a free government purchasing cooperative; active in all 50 states, the US territories, Canada and Mexico, authorized by the Ohio Revised Code, section 9.48 “joint purchasing program”.

The team developed a project which consists of draining out the tank to get crews in there to remove the loose and flaking material from the dome, applying a new primer and coating system on the inside of the dome to protect it from further deterioration and making maintenance activities such as cleaning much easier. The product proposed for this application is warranted for ten years and considered the “industry standard” for potable water applications as far as coating systems go. The cost for this work has been quoted at \$93.50 per square foot, it is unknown what the exact square foot of repairs is needed until they get in there, so we are estimating 320 square feet of repairs, providing a not to exceed cost of \$29,920.

BUDGETARY INFORMATION: The total cost shall not exceed \$29,920 which includes materials, delivery, installation, warranties and contingencies, which shall be paid for with Water Funds.

ACTION REQUESTED: It is requested that legislation be approved for the Lining Repair and Replacement to the inside of the Dome Building at Big Island Water Works (BIWW) with Advanced Rehabilitation Technology, LLC of Bryan, OH., through The Purchasing Cooperative of America; reference item #PCA OD-347-21 and that the necessary legislation be passed under suspension of the rules and in accordance with Section 14 of the City Charter in order to replace the coating system inside a clarifier at the earliest opportunity as it is a critical component of the water treatment process.

Subject: **Commission Agenda Item – Permission to Bid the 2023 Underpass Rehabilitation at Columbus Avenue**

ITEM FOR CONSIDERATION: Requesting legislation authorizing the City to accept bids for the 2023 Underpass Rehabilitation at Columbus Avenue Project.

BACKGROUND INFORMATION: The City of Sandusky is responsible for the approaches to, and general maintenance of, all underpasses throughout the City. Norfolk Southern (NS), the major rail user of these underpasses, is responsible for the structural aspects (concrete abutments and steel supports) of the underpasses but take no responsibility in the public portions beyond the structure. Underpass safety and the conditions of these underpasses is and will always be an item of concern as we navigate the relationship with NS.

In the fall of 2022, the City found itself a victim of a train derailment at the Columbus Ave underpass, of which rehabilitation projects were planned for or already under construction that were brought to a halt. At the time of the derailment, improvements were under way at the Columbus Avenue Lift Station and staff was preparing for a project that would improve underpass lighting, while cleaning and coat masonry walls. The underpass itself is in fairly good condition as it had a complete reconstruction in 1999 to address some major masonry concerns and later in 2017 some repairs and preventative maintenance were complete. As a result of the derailment, the lift station had to be completely reconstructed through the City's contractor and repairs to the remainder of the damaged infrastructure were facilitated by Norfolk Southern. The majority of this work is complete or is expected to be completed by the end of September.

Hence, staff is ready to move forward with the previously planned rehabilitation project, which will address the following components:

- Replace the remaining unsafe walkway handrail to a rustproof aluminum style to match the other half that will be replaced by the railroad. This is the most costly element of work.
- Upgrade underpass lighting to match the LED lighting fixtures on the Camp Street underpass for pedestrian and driver safety.
- Power wash and chisel off the existing wall coatings to the stone/concrete structure.
- Repair delamination and cracks with specialized cements and epoxies.
- Reapply a new waterproof coating system.

The 2023 Underpass Rehabilitation at Columbus Avenue project has an Engineer's Estimate of \$499,663.50 and a completion date of June 7, 2024.

BUDGETARY INFORMATION: The estimated construction cost for the 2023 Underpass Rehabilitation at Columbus Avenue project is \$499,663.50, which shall be paid with American Rescue Plan Act (ARPA) Stimulus Funds.

ACTION REQUESTED: It is recommended that the proposed 2023 Underpass Rehabilitation at Columbus Avenue project be approved and that the necessary legislation be passed under suspension of the rules and in accordance with Section 14 of the City Charter in order to accept bids and award a contract to begin ordering fencing material as there are extremely long lead times on this type of material.

Subject: **Commission Agenda Item – Permission to Bid the 2023 West Monroe Street Outfall**

ITEM FOR CONSIDERATION: Requesting legislation authorizing the City to accept bids for the 2023 West Monroe Street Outfall project.

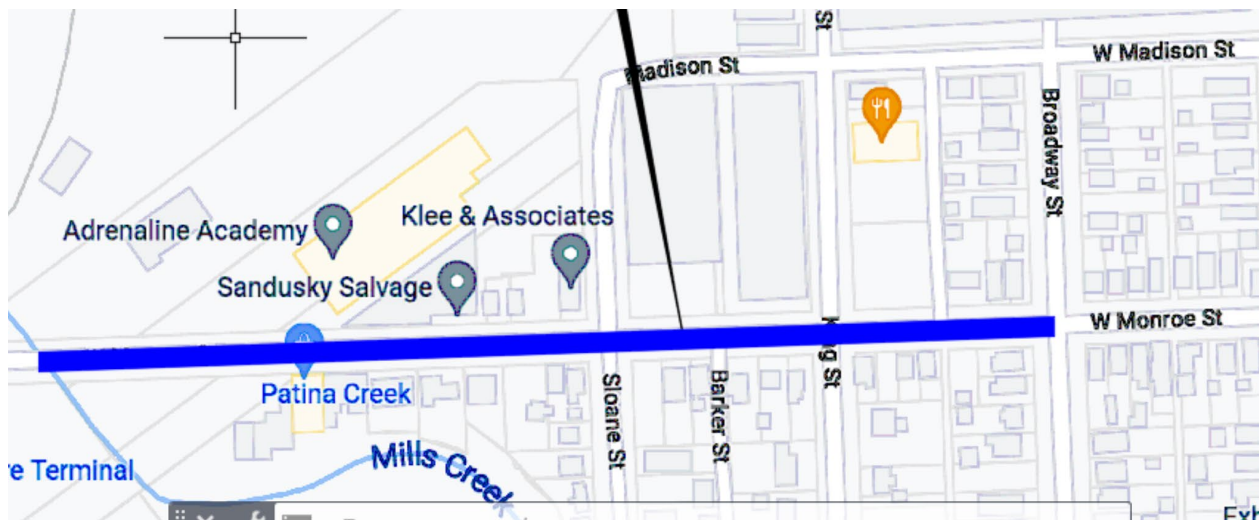

BACKGROUND INFORMATION: As the City continues to separate sewers to lessen the effects of flooding and reduce the stormwater flows that get treated at the Wastewater Treatment Plant (WWTP), this project moves in that direction.

This project specifically adds almost 1500' of 36" storm sewer dedicated for carrying stormwater flows westward, away from the intersection of Broadway and W. Monroe Street, discharging this clean water into Mills Creek at the existing bridge there. Surface runoff for the roadway is collected in 8 new catch basin structures that will have the ability to absorb more runoff than the existing basins. This project was designed in-house and will take the most economical route, just inside the North curb line, to expedite construction and reduce the maintenance of traffic. This project will divert thousands of gallons of stormwater away from the treatment plant and send it directly into the bay.

Engineering staff stresses the importance to get this project bid as quickly as possible because it is planned to be a precursor to the 2025 W. Monroe Street drainage and paving project, which will resurface and add a dedicated storm sewer from the intersection of W. Monroe & Broadway to W. Monroe & Camp Street. In totality, this sends W. Monroe Street roadway runoff from Camp Street Westward into Mills Creek.

Additionally, another roadway and drainage project were recently awarded grant funding and planned for 2027, running from Camp Street to Decatur Street.

The project has an Engineer's Estimate of \$645,040.00 and a completion date of April 1, 2024.

BUDGETARY INFORMATION: The estimated construction cost for the 2023 West Monroe Street Outfall project is \$645,040.00, which shall be paid for with Sewer Funds.

ACTION REQUESTED: It is recommended that the 2023 West Monroe Street Outfall be approved for bidding and that the necessary legislation be passed under suspension of the rules and in accordance with Section 14 of the City Charter in order to bid the project, receive competitive prices and complete the project by the deadline of April 1, 2024.

Subject: **Commission Agenda Item – Professional Design Services Agreement for the Sandusky Wheels Park Design and Construction Documentation**

ITEM FOR CONSIDERATION: Agreement with OHM Advisors of Cleveland, Ohio, for design services for completing the Sandusky Wheels Park Design and Construction Documentation project.

BACKGROUND INFORMATION: The city has recently completed a preliminary design and community engagement process to envision a new 12,000 square foot all-wheels park with improved pedestrian access, three entry plazas with shade and seating, and resurfacing of the adjacent parking lot. OHM was the lead consultant on the recently completed project. The Sandusky Wheels Park Design and Construction Documentation project will develop all required construction documentation and bidding documents required for the city to put the project out to bid for construction. Primary components of the park include: semi-separated beginner/mellow area, bowl, pump track, jump line, street elements, and public art.

Sandusky Wheels Park will be a destination public park accessible to users of all wheels, all ages, and all skill levels. The existing skate park was constructed in approximately 1999/2000 and is at the end of its useful life. This public amenity is well used by residents and visitors of all ages and has a passionate group of supporters advocating for its replacement and revitalization.

The City issued a Request for Qualifications (RFQ) for the Sandusky Wheels Park Design and Construction Documentation Project in which two (2) qualification packages were received. A selection committee reviewed, evaluated, and ranked each package and based upon their experience, professional expertise and knowledge, past performance with similar projects, project approach, schedule, and location, it was determined, OHM Advisors was the most qualified. A final Scope of Services (SOS), dated August 21, 2023, is attached to the legislation as Exhibit "A".

The general scope of the professional services include:

- Existing Conditions Review and Analysis: information gathering, project timeline and communications schedule
- Design and Construction Documentation: all necessary components for construction and permitting
- Bidding Documents: construction document finalization and support for project manual/bid book
- Bidding: support for pre-bid and bidding RFI's

The final deliverable will allow us to bid the project in 2024.

BUDGETARY INFORMATION: The design services will not exceed \$49,700 including all normal reimbursable expenses and will be funded by American Rescue Plan Act Stimulus funds.

ACTION REQUESTED: It is recommended that an ordinance authorizing a Design Services contract between the City of Sandusky and OHM Advisors of Cleveland, Ohio, for the Sandusky Wheels Park Design and Construction Documentation Project in the amount of \$49,700 be prepared and that the necessary legislation be passed under suspension of the rules and in accordance with Section 14 of the City Charter in order to expeditiously proceed with the professional services and have the design completed by January of 2024.
